

Customer Support Escalation Matrix

Document ID: ESC-007 | Owner: Operations & Customer Experience | Version: 1.0

Purpose: This controlled document defines business rules used by BizInsight AI when answering customer, sales, and operational questions.

Routing Rules

Issue Type	Primary Team	Typical Escalation Trigger
Payment / Billing	Finance Team	Payment mismatch, duplicate charge, settlement issue
Technical Product Issue	Technical Support	Product malfunction or troubleshooting beyond standard FAQ
Refund Issue	Customer Care	Refund eligibility or delayed refund requiring review
Shipping Exception	Logistics / Customer Care	Lost, delayed, or carrier exception
Legal / Compliance	Legal Team	Formal legal request, regulatory concern, or dispute

Assistant Behavior

- Provide the relevant known information before escalating where appropriate.
- Do not promise a resolution or exception that is outside the assistant's authorized knowledge.
- For unresolved issues, identify the correct team and explain the next expected step.
- When an issue is urgent or safety-related, follow the highest-priority escalation path.

Routing principle: use the issue category and known facts to identify the appropriate escalation team; this matrix provides the approved routing rule.

Internal business reference. Rules may be updated by the document owner; the latest approved version takes precedence.
