

Customer Loyalty Program

Document ID: LOY-001 | Owner: Operations & Customer Experience | Version: 1.0

Purpose: This controlled document defines business rules used by BizInsight AI when answering customer, sales, and operational questions.

Program Overview

The BizInsight loyalty program rewards customers based on eligible annual purchase value. Membership is evaluated using completed orders only; cancelled orders do not contribute.

Membership Tiers

Tier	Annual Eligible Spend	Core Benefits
Silver	Below ■50,000	Standard customer support; promotional offers
Gold	■50,000 to below ■100,000	8% discount on eligible products; free standard shipping
Platinum	■100,000 and above	15% discount on eligible products; priority support; free standard shipping; early product access

Eligibility and Calculation Rules

- Eligible spend is the sum of completed order totals attributed to the customer during the membership evaluation period.
- Cancelled orders are excluded from eligible spend.
- Returned orders reduce eligible spend after the return is confirmed and processed.
- Membership benefits apply after the tier is assigned in the customer account.
- Discounts do not automatically apply to products explicitly marked as excluded from promotions.

Illustrative Example

A customer with ■126,500 in eligible completed purchases qualifies for Platinum membership. Under the standard program terms, the customer receives a 15% discount on eligible products.

Support Guidance

- Verify the customer record before confirming tier status.
- Use transaction data for spend questions and this policy for benefit questions.
- When a question requires both spend and benefit information, combine the customer data with the applicable policy section.

Decision rule: structured purchase history determines eligibility; this document determines the corresponding benefits.

Internal business reference. Rules may be updated by the document owner; the latest approved version takes precedence.
