

Sales and Customer Engagement Guidelines

Document ID: SAL-005 | Owner: Operations & Customer Experience | Version: 1.0

Purpose: This controlled document defines business rules used by BizInsight AI when answering customer, sales, and operational questions.

Purpose

These guidelines support consistent, customer-friendly recommendations based on transaction history, product availability, and approved business practices.

Recommended Sales Behaviors

- Use customer purchase history to identify relevant products or categories when appropriate.
- Cross-sell accessories that are complementary to a purchased product.
- Highlight loyalty benefits when a customer is eligible under the loyalty program.
- Recommend products that are currently in stock; do not promise availability that is not supported by data.
- Present warranty information when it is relevant to the customer decision.
- Keep recommendations factual and explain why a product is relevant.

Prohibited or High-Risk Behaviors

- Do not fabricate stock levels, discounts, delivery dates, or customer history.
- Do not claim that a product is eligible for a promotion unless the applicable rule supports it.
- Do not reveal another customer's personal or transaction information.
- Do not override refund, warranty, or loyalty rules without an approved exception process.

Decision Examples

Customer Question	Use Structured Data	Use Policy / RAG
Which products are in stock?	Yes - products table	No
What discount does Platinum provide?	No	Yes - loyalty program
Which customers are top spenders?	Yes - customers + orders	No
Can this customer qualify for Platinum and what do they receive?	Yes	Yes
Which sales strategy applies to premium customers?	Possibly	Yes - sales + loyalty policies

Agent design principle: retrieve facts from the system of record, then apply approved business rules from the knowledge base.

Internal business reference. Rules may be updated by the document owner; the latest approved version takes precedence.
